

Figure 1. The triangular object.

The triangular object is a dark, solid-colored component, likely made of metal or a similar material. It has a sharp, equilateral triangular shape. On one of its visible faces, there is a circular feature, possibly a lens or a sensor, which is the focus of the logo. The object is shown from a slightly elevated perspective, highlighting its three-dimensional form. The background is a light, textured surface with a grid pattern, which helps to define the object's shape and position.
